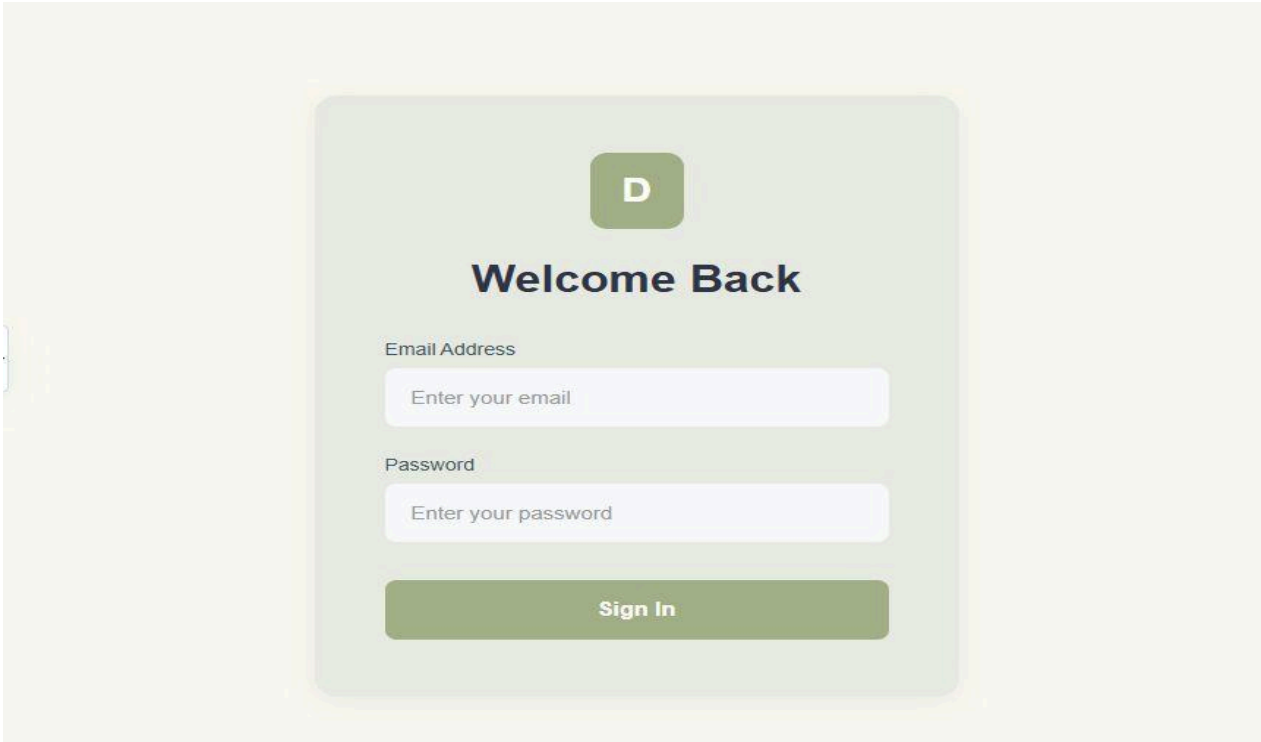
PROG 7311 ICE TASK 2:

Group name: Spicy Ninjas
Group Members:

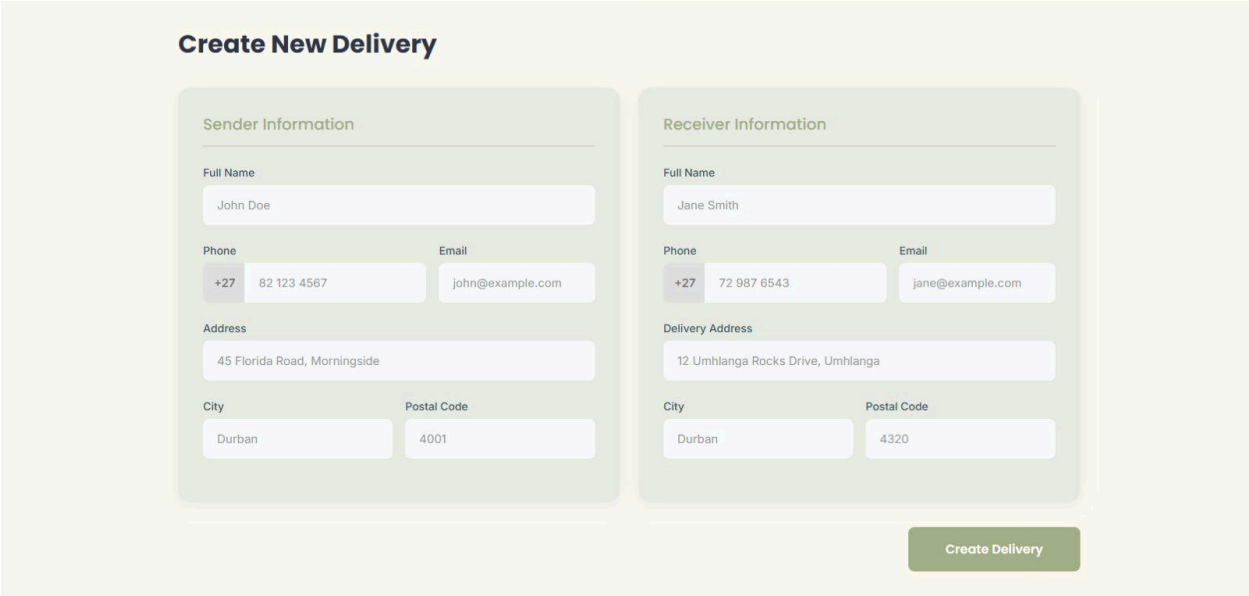
- Arya Rajaram- ST10442523
- Shreya Sewsanker- ST10440223
- Raul Sheoshanker- ST10444616
- Yuvay Govender- ST10440330
- Shrey Videsh Singh- ST10438635

Home Screen:

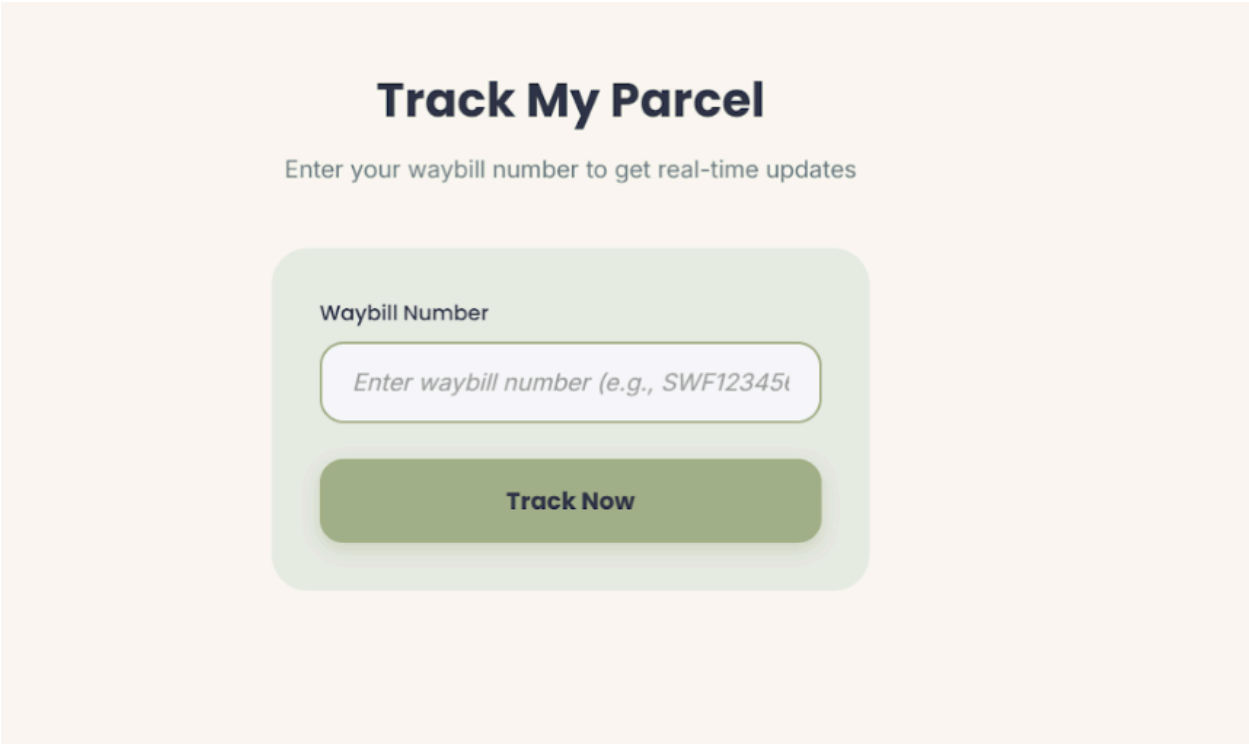
Login: If an admin or diver clicks login it will direct them to this page. We are using a central login and role based authentication to direct the user to the correct screen.



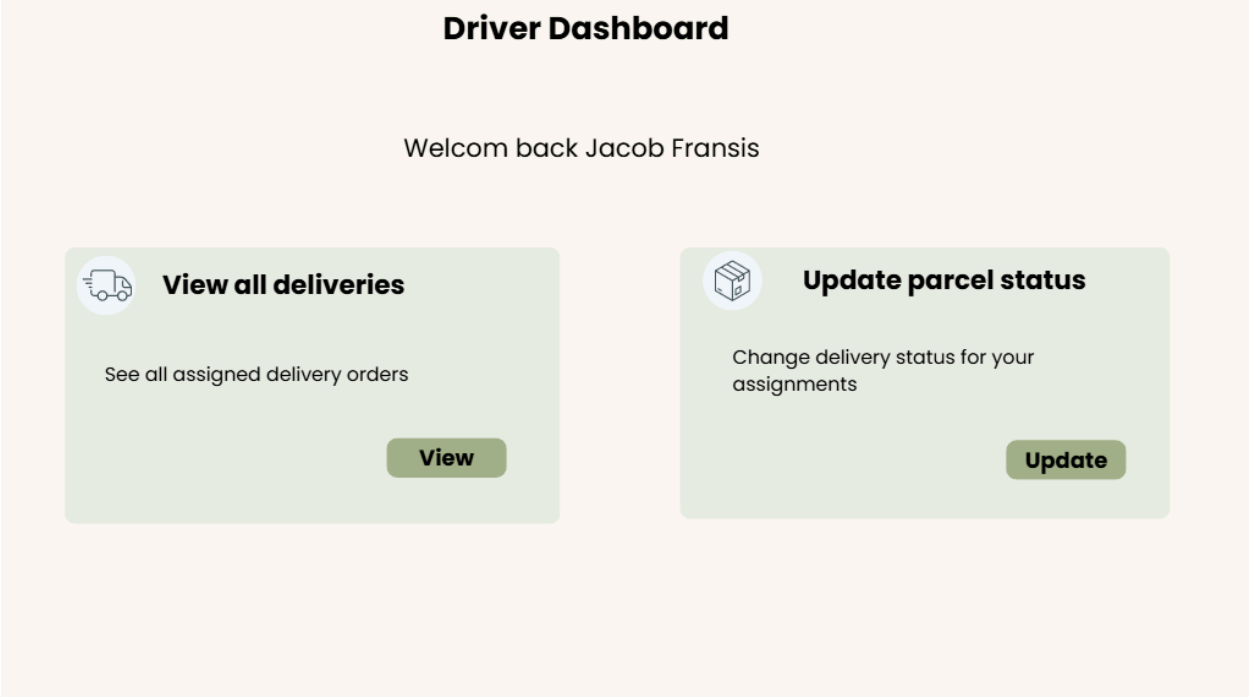
Create delivery: A user does not have a login, if they want to place a delivery they are directed to this page. Each order will be given a tracking number.



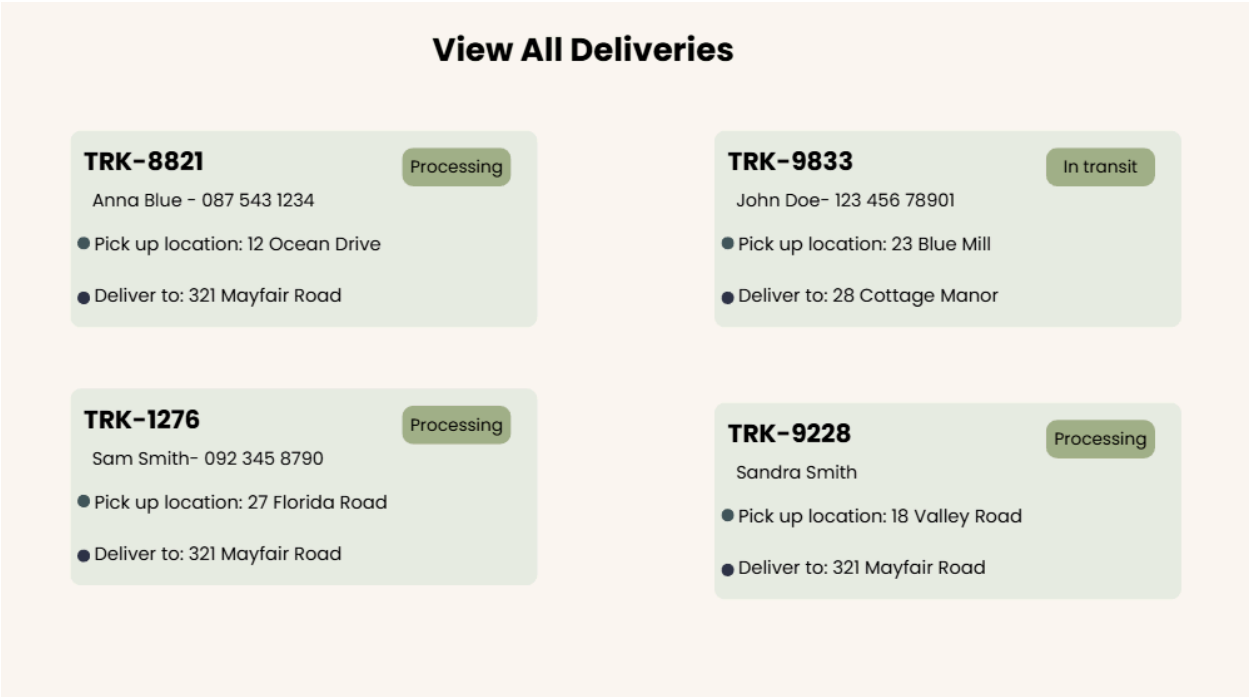
Track delivery: A user can use their unique tracking number for each delivery to check the status of their parcel



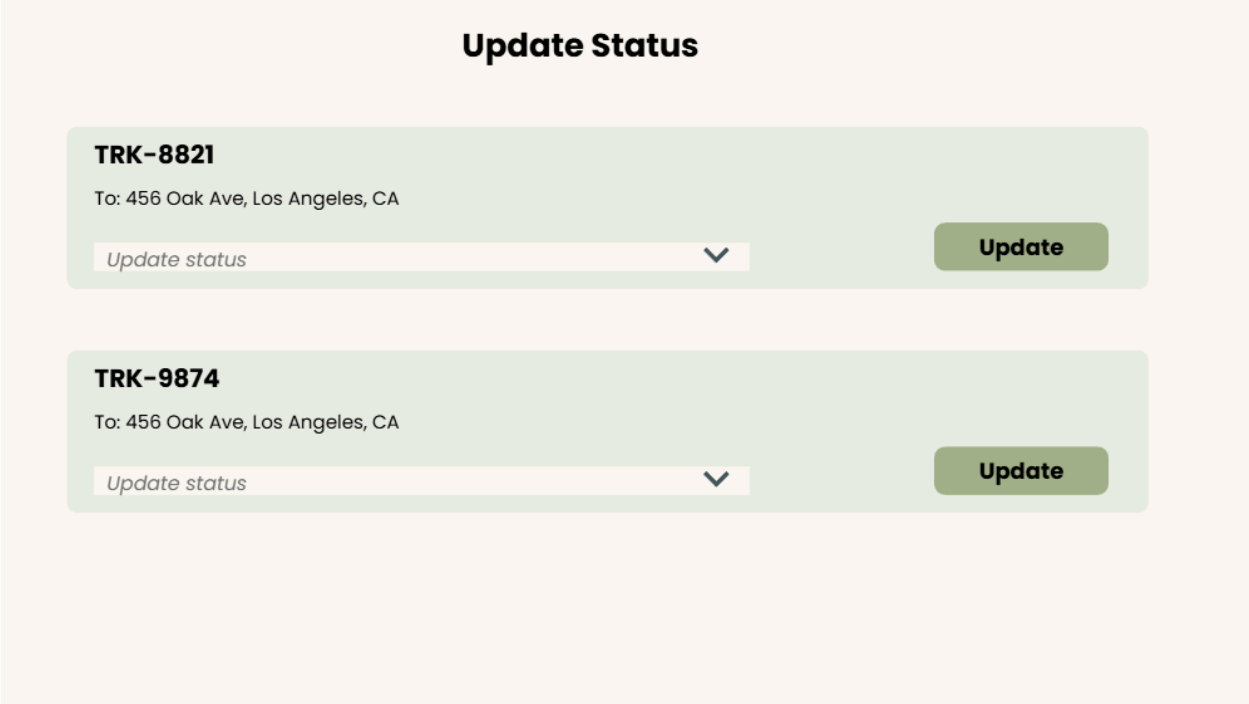
Driver Dashboard: This is the central dashboard for driver



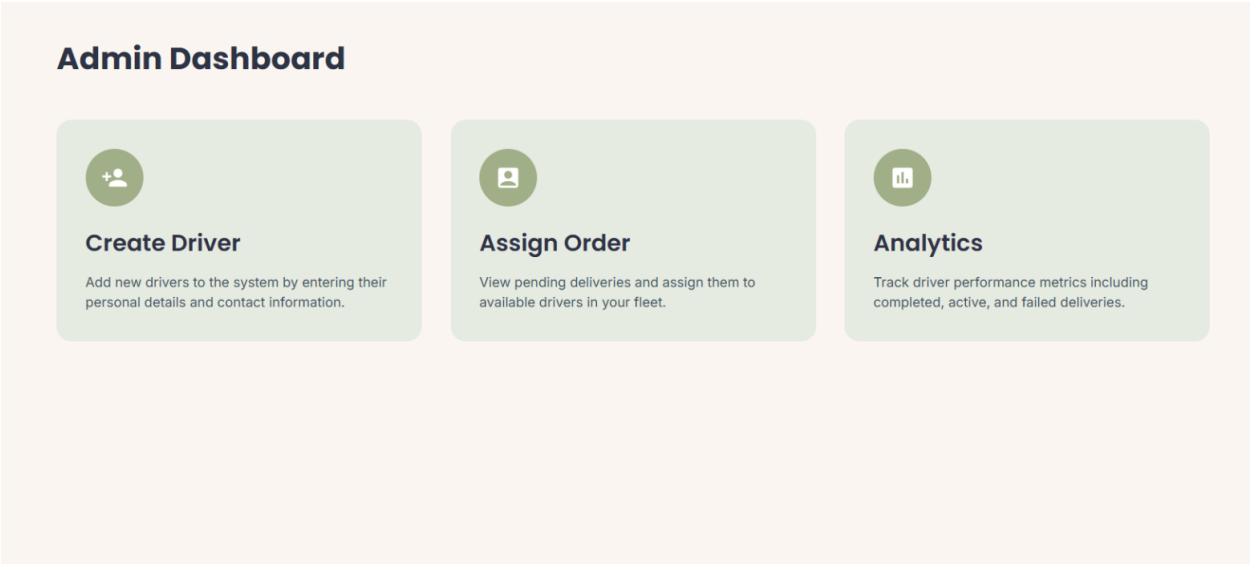
View all deliveries: A driver can view all the deliveries that they are assigned to by the admin



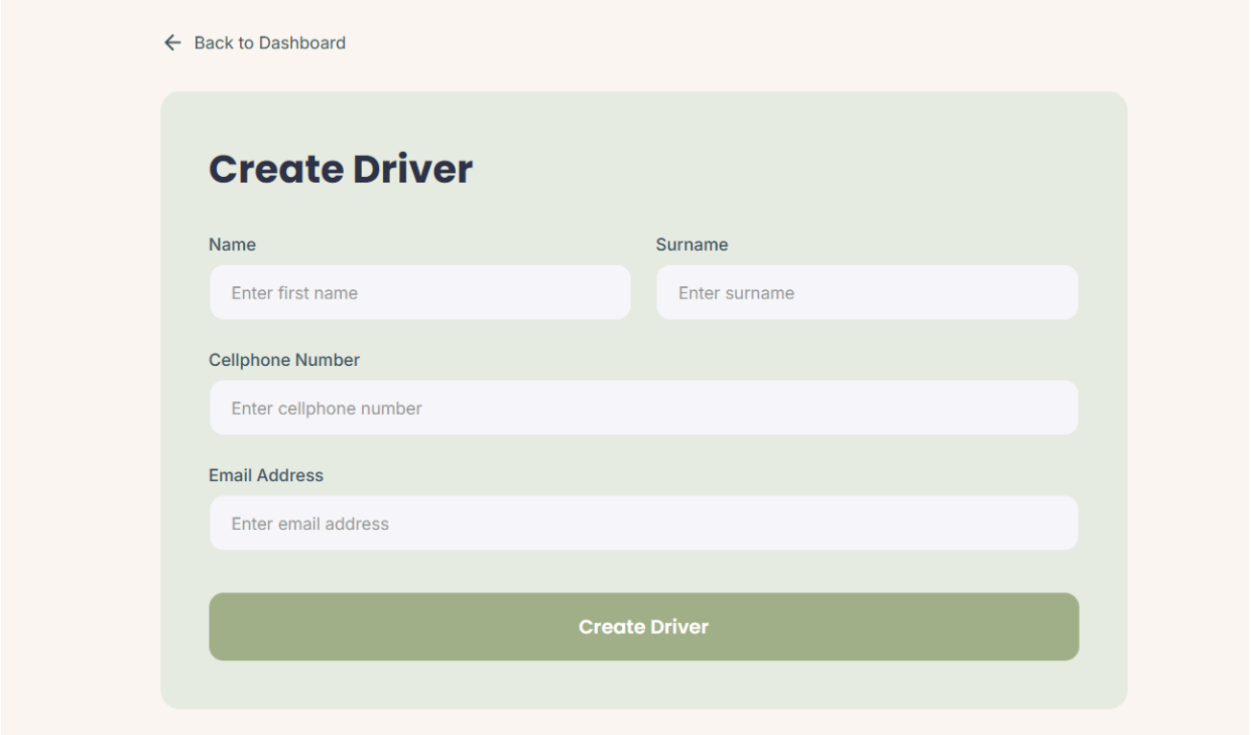
Update Parcel Status: The driver can update the status of a parcel with the pre populated drop down box and it will reflect to the user in real time.



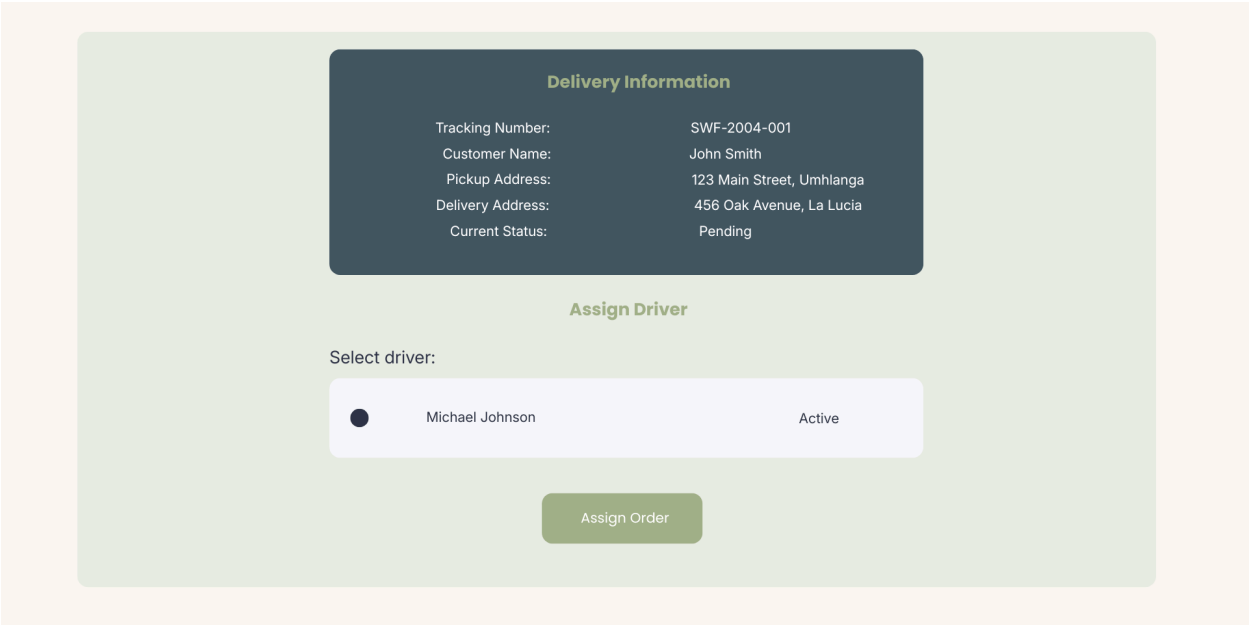
Admin Dashboard: Central dashboard for an admin

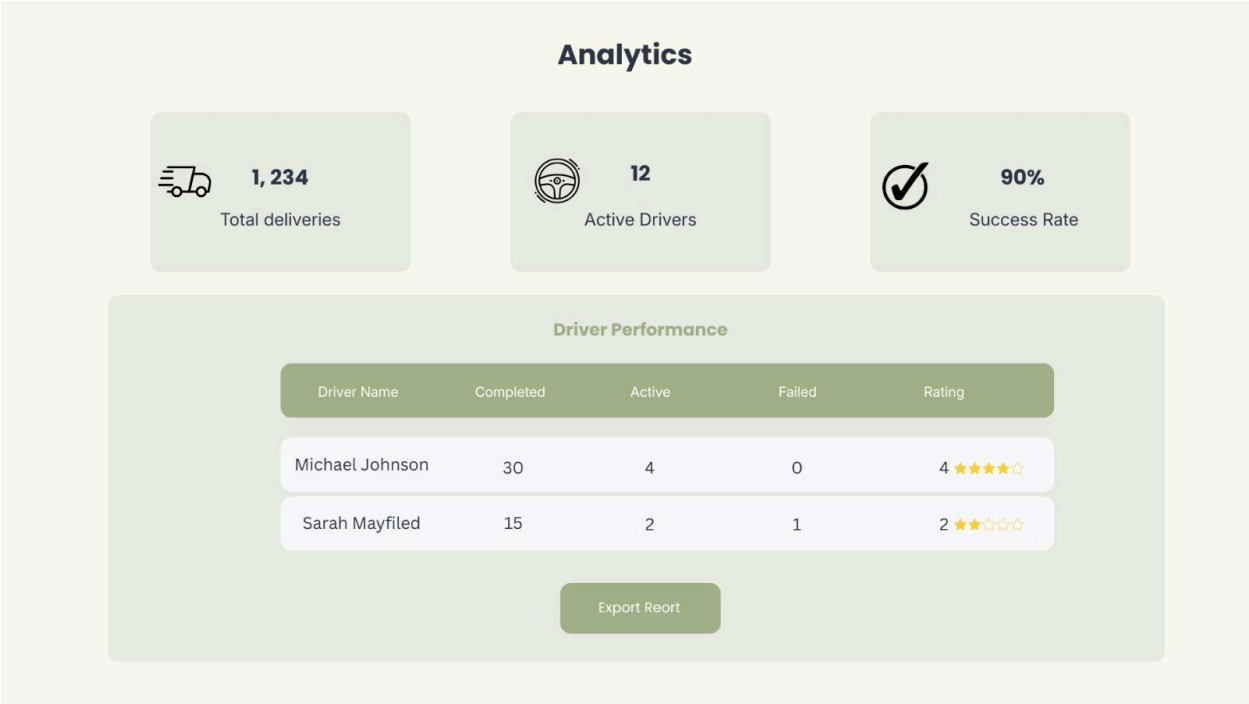


Create Driver: A limitation we have is that only admins are allowed to create drivers. So they are able to do this through this screen



Assign Order: Admins can assign each order to a driver and once it is assigned it will be removed from their screen and reflect under the “View deliveries” screen of the driver





Analytics: This is where admins can check the performance of drivers and the statistics of the company.
