MODULE NAME:	MODULE CODE:
INFORMATION SYSTEMS 3A	INSY7311/w
USABILITY	USAB7311

ASSESSMENT TYPE: ASSIGNMENT 2 (PAPER ONLY)

TOTAL MARK ALLOCATION: 100 MARKS

TOTAL HOURS: A MINIMUM OF 10 HOURS IS SUGGESTED TO COMPLETE THIS ASSESSMENT.

By submitting this assignment, you acknowledge that you have read and understood all the rules as per the terms in the registration contract, in particular the assignment and assessment rules in The IIE Assessment Strategy and Policy (IIE009), the intellectual integrity and plagiarism rules in the Intellectual Integrity and Property Rights Policy (IIE023), as well as any rules and regulations published in the student portal.

INSTRUCTIONS:

1. ***No material may be copied from original sources, even if referenced correctly, unless it is a direct quote indicated with quotation marks. No more than 10% of the assignment may consist of direct quotes.***
2. ***Your assignment must be submitted through Turnitin.***
3. ***Save a copy of your assignment before submitting it.***
4. *Assignments must be typed unless otherwise specified.*
5. *All work must be adequately and correctly referenced.*
6. *This is an individual assignment.*

Referencing Rubric

Providing evidence based on valid and referenced academic sources is a fundamental educational principle and the cornerstone of high-quality academic work. Part of achieving this quality is referencing in a way that is consistent and congruent with the requirements of the referencing style being used.

Therefore, inconsistent and/or incongruent referencing will result in a penalty of **a maximum of ten percent being deducted from the overall percentage** awarded to your assessment submission.

Please note that **evidence of plagiarism** in the form of copied or unreferenced work, absent reference lists, or exceptionally poor referencing **may result in action being taken in accordance with The IIE's Intellectual Integrity and Property Rights Policy (IIE023)**. Similarly, **evidence of excessive AI usage may result in action being taken in accordance with The IIE's Student Conduct, Discipline and Safety Policy (IIE015)**.

Markers are required to provide feedback to students by **circling/underlining the information in the table below that best describes the student's work and by adding constructive commentary where appropriate.** The examples provided are not exhaustive but illustrate the errors.

Deductions

- Where the student's work contains **five or more errors** aligned to the **minor errors column** below, **deduct 5% from the overall percentage.**
- Where the student's work contains **five or more errors** aligned to the **major errors column** below, **deduct 10% from the overall percentage.**
- **Where both minor and major errors** (e.g. two minor and three major, etc.) are present, **deduct 10% only** (and not 5% or 15%) from the overall percentage.

Required: **Consistent and congruent referencing**	**Minor errors** **Deduct 5% from overall percentage.** **Example: if the response receives 70%, deduct 5%. The final mark is 65%.**	**Major errors** **Deduct 10% from the overall percentage.** **Example: if the response receives 70%, deduct 10%. The final mark is 60%.**
Consistency • The **correct referencing style** for the **discipline** – i.e., either **Harvard**, OR **APA** (for Psychology)**,** OR **Law**, OR **IEEE** (for ICT/Engineering) – has been used consistently for all in-text references and in the bibliography/reference list. • **Concepts** and **ideas** that are **quoted** and/or **paraphrased** are referenced consistently throughout. • **Position of the in-text reference**: an in-text reference is positioned consistently where appropriate for every quote and paraphrase.	**Minor inconsistencies:** • The referencing style used is generally consistent with what is required, but there are one or two changes/errors in the format of in-text referencing and/or in the bibliography/reference list. • For example, page numbers for direct quotes in-text have been provided for one source, but not in another. Or, two book chapters in the bibliography/reference list have been referenced in two different formats. Or, the publication year has been placed after the author name in one bibliography/reference list entry, and after the source title in another, etc. • Concepts and ideas in quotes and/or paraphrases are typically referenced, but a full in-text reference is missing or incomplete from one or two small sections of the work. • Position of the references: in-text references are only given at the beginning and/or end of every paragraph.	**Major inconsistencies:** • Poor and wholly inconsistent referencing style used in-text and/or in the bibliography/reference list. • Multiple referencing styles for the same source types have been used. • For example, the format for direct quotes in-text and/or book chapters in the bibliography/reference list and/or year of publication in the bibliography/reference list is different across multiple instances. • Concepts and ideas in quotes and/or paraphrases are haphazardly referenced in-text. • Position of the references: in-text references are only given at the beginning or end of large sections of work.
Feedback on referencing consistency:		
Congruency • **Each source** reflected within **in-text references** is included accurately in the **bibliography/reference list.** • All **bibliography/reference list** entries are in the **required order** for the referencing style used (e.g. alphabetical, alphabetical under subheadings, numerical). • All **direct quotes** and **paraphrases** have been **integrated appropriately** into the text using introductory phrases, accurate grammar, etc.	**Minor incongruences:** • There is largely a match between the sources presented in-text and those in the bibliography/reference list, but one or two sources that appear in-text do not appear in the bibliography/reference list, or vice versa. Or key source information is missing from one or two in-text references or bibliography/reference list entries only (e.g. publication year, city of publication, URL date accessed, etc.). • There is a clear and largely accurate ordering of sources in the bibliography/reference list as required by the referencing style used, but with one or two references out of order. • An attempt has been made for source integration into the text using appropriate introductory phrases and grammar, but one or two quotes or paraphrases do not flow as clearly or logically within the sentence structure as they could.	**Major incongruences:** • No relationship/several incongruencies between the in-text referencing and the bibliography/reference list. • For example, multiple sources are included in-text, but not in the bibliography, and/or vice versa. Key source information is missing from multiple in-text references and/or reference list entries. A URL link, rather than the actual reference, is provided in the bibliography. Sources are repeated in the reference list, etc. • Most sources are listed in a haphazard order throughout the bibliography/reference list. • Few to no appropriate introductory phrases or rules of grammar have been applied, and many direct quotes and/or paraphrases feel disconnected from the flow of the text.
Feedback on referencing congruency:		
Overall feedback on referencing, with suggested improvements:

General Instructions

Assignments 1 and 2 and the Summative Project are based on the progressive development of a prototype of a mobile application aimed at students. Each of your assessments progressively builds on the previous one.

At the end of this specific task, students will have covered the following module objectives:

- *MO01: Apply HCI guidelines and best practices to develop interactive and responsive interfaces*
- *MO02: Analyse user requirements and design user-centred interfaces.*
- *MO03: Identify relevant metrics and criteria to evaluate usability and user experience*

Assessment:

Deliverable	Marks	Duration	Learning Units
Assignment 2	100	10hrs	LU6 to 7

AI tools such as ChatGPT are not allowed to be used. Your work must be your own. Content copied from an AI tool is considered plagiarism.

Assignment 2 (Marks: 100)

Instructions:

Make the necessary changes to the report that you submitted for Assignment 1 after receiving feedback from your lecturer. Once you have made the necessary improvements to Assignment 1 based on the lecturer's feedback, complete the assignment requirements below.

Requirements:

Write a report that includes the following:

1. A short explanation of the feedback received for Assignment 1 and explain how you implemented it in Assignment 2.
2. Expand on the low-fidelity prototype that you developed for Assignment 1 by including any five (5) design principles and/or guidelines (covered in LU6) to improve the user experience of the mobile application.
3. In addition, develop an evaluation **plan** for the user interface prototype that you have designed. Motivate the evaluation plan by referring to the relevant theory covered in LU7.
4. Define each evaluation/testing **method** proposed, motivate employing the method(s) and detail how the method(s) will be implemented.

Refer to the rubric for the mark allocation.

When submitting Assignment 2, take note of the following:

- Your document must have a cover page with your name, surname, student number, module code, assessment type (Assignment 2), and date.
- Include a table of contents.
- Pages should be numbered, and appropriate headers and footers used where necessary.
- Use Calibri font, size 11pt, justified paragraphs and line spacing 1.15. Font size for headings can be larger and highlighted by using bold and/or underlining.
- Use the Harvard referencing style and remember to include a reference list at the end of each document.

DESIGN PRINCIPLE/GUIDELINE 1	**13-15**	**7-12**	**4-6**	**0-3**	
	An excellent low-fidelity prototype representing one of the design principles/guidelines is included. An excellent description of the principle/guideline and how it was applied is provided.	A good low-fidelity prototype representing one of the design principles/guidelines is included. A good description of the principle/guidelines and how it was applied is provided.	The prototype presented is not completely related to one of the design principles/guidelines, and/a description of the principle/guideline and how it was applied is not provided.	The low-fidelity prototype is missing or lacking in substance.	
DESIGN PRINCIPLE/GUIDELINE 2	**13-15**	**7-12**	**4-6**	**0-3**	
	An excellent low-fidelity prototype representing one of the design principles/guidelines is included. An excellent description of the principle/guideline and how it was applied is provided.	A good low-fidelity prototype representing one of the design principles/guidelines is included. A good description of the principle/guidelines and how it was applied is provided.	The prototype presented is not completely related to one of the design principles/guidelines, and/or a description of the principle/guideline and how it was applied is not provided.	The low-fidelity prototype is missing or lacking in substance.	
DESIGN PRINCIPLE/GUIDELINE 3	**13-15**	**7-12**	**4-6**	**0-3**	
	An excellent low-fidelity prototype representing one of the design principles/guidelines is included. An excellent description of the principle/guideline and how it was applied is provided.	A good low-fidelity prototype representing one of the design principles/guidelines is included. A good description of the principle/guidelines and how it was applied is provided.	The prototype presented is not completely related to one of the design principles/guidelines, and/or a description of the principle/guideline and how it was applied is not provided.	The low-fidelity prototype is missing or lacking in substance.
